

## PVC SERIES VERTICAL FLOATS

PVC series floats are collision survivable floats for marking areas or floating lines in protected waters.

- The PVC series is made of closed cell, crosslinked polyethylene foam covered with a tough Seathane® polyurethane skin.
- Steel components of these floats are hot dip galvanized carbon steel. Stainless steel metal components is an option.

Floats in this series are not internally ballasted. They depend on the weight of the mooring to maintain a proper attitude. A underwater weight of 10% to 20% of the float's net buoyancy should be provided by the mooring.

Model No.	Diameter	Height	Rod Dia.	Weight	Net Buoyancy
PVC-18	18"	16"	5/16"	14 lbs.	133 lbs.
PVC-24	24"	23"	3/8"	25 lbs.	340 lbs.
PVC-30	30"	28"	1/2"	52 lbs.	635 lbs.

These floats are not intended for use in areas where ice may crust in excess of 3".
